thousand troops wearing red-bordered black epaulets, including some with tank insignia, and black-bordered black epaulets with signal insignia. About seven T-34/85 tanks, ten BA-64 armored scout cars, ten armored personnel carriers, about 18 x 37 mm AA guns, ten rocket launchers, 50 mortorcycles with sidecars and about 300 trucks, including 20 with pontoons, have thus far been observed in the installation.

25X1A Comments:

- 1. The elements of the 6th Guards Mechanized Division which returned to Eberswalds had presumably, along with units of the 25th Tank Division, participated in exercises in the area north of Berlin.
- 2. The returning units, coming from Altengrabow, probably belonged to the 20th AT Artillery Brigade.
- 3. Probably units of the 20th Guards Mechanized Division returning to their post from Camp Crawinkel.

the 16th (?) Gds RL Bn, and the unidentified signal baltalian. These units can be confirmed up to 4 October 1953. As the signal baltalian is included in this tabulation, there is reason to be lieve that the division headquarters may also be stationed there According to the rough strength estimate given in paragraph 3 of the present report, the 111th and the 162d Tank Regt of the division may also be stationed in the Weisse Stadt settlement, although service colors observed fail to give pertinent indication.
